Supplies needed:

3/4 inch birch veneer

SPAX screws, 2 1/2 inch, T20 star bit

Titebond III adhesive

LED light strands

12 volt power supply, 5 amp

5/8 inch wood screws

One 15" \* 15" inch mirror - silver

One 15" \* 15" inch mirror - two-way transmission

3X Varathane coating

1 can spray paint enamel - flat black

Electrical clamps

Padding for frames, lights and mounting

Wood frame for mirrors to mount upon

No particle board (This is truly an **offensive** material.)

No nails (Why hammer wood? Are you angry with it?)

No inferior plastics (We use glass and wood only.)

No AC powered lights (Reduced risk of fire or shock.)

No shoddy construction (This is heavy-duty and durable.)

Now:

contact us to build one for you! Tell us your needs... let us know what you want for your game/rec room. This **DC**-powered LED "Infinity Mirror" has a life-span of 50,000 hours while **CONSTANTLY ON**. The entire light assembly (this one, anyway) uses approximately 2 amperes of current and 24 watts of power. We take our time to make this crafted individually just for you...Call us today to order one!
