1947 Mills Black Cherry - UK (6d; sixpence coin)

This Mills mechanical slot machine is located at Country Antique Fair Mall in Santa Clarita, CA. Mr. McClure purchased a 1947 Mills Black Cherry mechanical slot machine in the UK and had it brought to the US. California Antique Slots, Inc. verified the machine's operation and condition on camera for the television show (British Treasure, American Gold). This machine is a "dedicated original" (all completely original parts) from the Mills factory, configured to play the 6d (sixpence coin, smaller than the US nickel). Jesse's gamble in finding a valuable, one-of-a kind, and rare slot machine paid off!
