Sales of Slot Machines: 90 days

We are just a phone call/email/text away!

We cover parts and labor for a thirty (30) day period after any initial repair to your slot machine(s). We will make a reasonable number of attempts to keep your machine up and running during the warranty period. As a slot machine owner, you can assist us with this in mind: please be gentle with your antique slot machine. It is many decades old. Many of the parts are difficult to find.

We highly recommend having us out to you for yearly maintenance to clean, lubricate and check the workings of your slot machine(s).

Some slot machines are simply **not** fixable or reparable. This must be understood by the owner/slot enthusiast. Antique mechanical, electromechanical or electronic slot machines have many different interrelated parts that fail occasionally. A house call narrows down the problem(s) that a machine experiences. We will try to find the problem(s). We will try to SOLVE the problem(s). We will explain the problem(s) thoroughly to you. In other words, we will do our best.

Any slot machine purchased from us has a separate **90-day** parts and service warranty. Please see your warranty in your <u>Purchase Agreement</u>, <u>page 4</u>, highlighted in **blue**.

Slot machines or Pachinko games purchased from us that have been obviously abused, misused or used for illegal purposes are not covered by any warranty from us. We will not service any slot machine or Pachinko game where the owner/user has attempted unauthorized repairs. If, after we have serviced any slot machine you own, in a later house call we make for any service, we determine that it has been abused, misused or used for illegal purposes, we will not attempt any further repair(s) and any warranty will be null and void.
