California Antique Slots, Inc.

The following descriptions of each Bally E2000 series machine are not exhaustive. The prospective buyer of any of the machines listed below can research these machines on the Internet, local libraries, or from the Bally Corporation.

The series E2000 machines have been available in California since 2007. These machines were better made and more reliable to play than the E1000 machines.

Many of these machines did not have names. Some of them were the electronic equivalent of the Bally electromechanical. As always, California Antique Slots, Inc. is in the process of researching these machines where information is missing.

Model Number	Machine Name	Made In	Interesting Facts
E2013		1985	Three reels, five lines
E2019		1986	Five reels
