California Antique Slots, Inc.

We love slot machines. We enjoy working on them, restoring them, and lovingly maintaining them so that others may enjoy them.

We came into being from just a simple idea. That idea was to form a business that would make house calls to repair mechanical [coin-operated] machines.

Our first machine was a mechanical pachinko game purchased at a garage sale way back in 1997. A jam in one of the many payoff chutes was removed in a matter of minutes. One 9-volt battery later, the newly-rewired bell was ringing furiously as streams of 11mm stainless steel pachinko balls came flying out of the jackpot chute.

That was machine number one. That humble beginning led to several other pachinko games. Those machines led to the purchase of a Mills electromechanical machine that needed complete rewiring and repainting.

How enjoyable that was! Over the years, many other machines followed. They were repaired and subsequently made operational again.

Now, we needed to do something. A name was born. A business plan was put forth. We registered our business in Ventura County in August 2002. We "hung our shingle" out for everyone to see. Registration with the Department of Justice followed. Next came an application with the California Gambling Control

Commission that was approved for our company to sell antique slot machines.

We now sell slot machines that are older than 25 years to any legal California resident. Our specialty is any of the mechanical US-made slot machines from 1900 on up. We repair Bally and the IGT (video poker and S-series) slot machines. We do not repair Pachislo or reproduction machines.

Fast forward to today. We became a corporation on May 7, 2003. And we will continue to grow with our client loyalty. Our goal is to provide service for our clients that is second-to-none as compared to other slot machine/gaming dealers.

We perform service that will last long beyond the 90-day warranty. Your machine's playability and longevity will be in our best interest for years to come.

We conduct all business with our clients by face-to-face contact. We will be there for you. We want you to enjoy your slot machine for many years. Call us today to repair a California-legal slot machine you own. We will quote a repair price. Your machine will be brought back to a playability level for your satisfaction.

Do we still make house calls for those old mechanical pachinko games? Yes, indeed we do. We never forget our humble beginnings.
